

ARTICLE 22.00
R.U.D. RESIDENTIAL UNIT DEVELOPMENTS

Section 22.01 **PURPOSE**

The purpose of the Residential Unit Development (R.U.D.) is to permit optional methods of development on sites 40 acres and greater and sites 80 acres and greater in all single-family residential districts thereby allowing a mixture of types of residential units. It is further the intent of this Article to permit development of residential patterns which encourage innovation in land use and variety in design, layout and type of structures constructed, achieve economy and efficiency in the use of land, natural resources, energy and the provisions of public services and utilities; encourage useful open space and provide better housing suited to the needs of the residents of the Township while insuring integration of the proposed development with the characteristics of the general planning area. Development under this Article shall be in accordance with a comprehensive physical plan establishing functional use areas, density patterns, open space and recreation areas and a fixed system of residential streets without unduly inhibiting the advantages of modern large scale site planning for residential purposes. The following regulations shall apply to all R-1-E, R-1-D, R-1-A, R-1-R, R-1-B and R-1-C, Single Family Residential Districts and shall be subject further to the provisions of ARTICLE 27.00 TOWNSHIP PLANNING COMMISSION SITE PLAN AND DEVELOPMENT APPROVAL of this Ordinance and the Frenchtown Subdivision Ordinance with respect to final development approval.

Section 22.02 **STATEMENT OF PRINCIPLES**

The Residential Unit Development (R.U.D.) is an optional method of development which may be permitted only after review and recommendation by the Planning Commission, public hearing, approval of the Township Board , after having found that the proposed R.U.D. reflects **all** of the following basic principles:

Section 22.02.1 The proposal is in conformity with the spirit and intent of the Residential Unit Development option as established in the Purpose Section of this Article.

Section 22.02.2 The site contains "natural" assets such as large stands of trees, rolling topography, significant views, floodplains, or wetlands which would be in the best interest of the community to preserve and which would otherwise be substantially destroyed under normal subdivision development. This determination shall be made by the Planning Commission and Township Board after review of a documented "Site Analysis" to be submitted by the applicant. If, after review of the site analysis, a determination is made that the site does not contain any "natural" assets which would be in the best interest of the community to preserve, the Planning Commission and Board may

FRENCHTOWN CHARTER TOWNSHIP ZONING ORDINANCE NO. 200

give further consideration to the proposal if provisions are made within the development to provide open space which would provide a buffer between a major thoroughfare or expressway, or provide a usable recreation open space with reasonable access to all lots of the development. The intent being to provide neighborhood recreation open space and to supplement the existing natural features of the Township. The recreation open space and/or buffer area would be developed in a manner with tree planting, etc. which would, over time, create a "natural" asset for the development and the community as a whole.

Section 22.02.3 The proposed development shall be in harmony with the existing and proposed land patterns of adjacent properties, and the general planning area and shall not result in a negative impact on the stability and orderly development of adjacent lands and the general planning area as indicated by the Future Land Use Plan.

Section 22.02.4 The proposed height, bulk, location and character of the structures proposed shall be in harmony with the existing and proposed structures of adjacent lands and the general planning area and shall not result in a negative impact on the stability and orderly development of adjacent lands and the general planning area as indicated by the Future Land Use Plan.

Section 22.02.5 The proposed location of uses which are of a significantly different scale or character than that of the abutting residential districts such as access drives, parking areas, solid waste pick-up points, swimming pools, tennis courts and facilities of a similar nature, on the subject property, shall be in harmony with the existing and proposed land patterns of adjacent properties and the general planning area and shall not result in a negative impact on the stability of the overlay development of adjacent lands and the general planning area as indicated by the Future Land Use Plan.

Section 22.02.6 The gross acreage of the subject property is a minimum of 40 acres.

Section 22.03 CHANGE OF DENSITY

No application shall be accepted for a use which will require a change in the overall density of the zoning district.

The Commission shall prepare a report stating the recommendation and the basis for the recommendations. The recommendations shall be forwarded to the Township Board along with any conditions upon which the approval is based.

Failure to request such extension shall be deemed an abandonment of the proposed Residential Unit Development. Further, the R.U.D. contract must be approved and entered into prior to granting approval of any Final Preliminary Plat or Final Site Plan approval. If Final Plat and/or Final Site Plan approval is sought for only a phase of the total Residential Unit Development, a Tentative Preliminary Plat and Tentative Site Plan shall be approved for the entire R.U.D. proposed and shall be incorporated by reference as an exhibit of the contract.
